

OrgsOnline Set-Up

OrgsOnline.com is the website we use at Agamim Classical Academy to manage our Meal Program and Before/After Care Program. Families need to create an account in order to use the website. Once the family user account is created, you will need to create users within that family account. Most families choose to assign one or two parents as the users.

To sign up:

Step 1) Go to www.orgsonline.com

Step 2) Select “Create New Account”

Step 3) The system will then ask you to create your family account. Agamim’s school code is 424ACAMN. Your family account will need to include at least one parent or guardian.

Step 4) Once your family account is created, you may create individual users within that account. For example, if you are the Smith family, you would create the Family Account (Smith). And then once that is set up, you may enter individual users – John Smith (father), Jane Smith (mother), etc... The only family members that would need a user name are ones who will be paying or submitting orders. You do not need to create user accounts for your children.

Step 5) Once you have entered your users, please click on “Manage Family Members” and add the student(s) names.

We strongly encourage you to review the our ‘How-To’ documents prior to using the system to ensure that you have an understanding of how it works. These documents are posted to the website and are also available by request in the front office.

If you have any questions, please contact the front office at 952-856-2531 or info@agamim.org
